

Koffi Jean Emmanuel Martial ADINGRA

Développeur Fullstack

As a determined, serious, and independent full-stack developer, I am fully committed to every project. Aware of the technical challenges of the role, I am rigorous, adaptable, and possess a strong sense of responsibility. Passionate about creating reliable solutions, I am proficient in both backend and frontend development. Motivated and proactive, I am confident that my dedication will make me a valuable asset to your team.

Work experience

Full-Stack Developer Intern

Xsel Services, Palmeraie, Cocody Ivory Coast From Feb. 2026 to Aug. 2026

- Developed web applications using **Laravel, Next.js, React, and TypeScript**.
- Designed and developed **RESTful APIs**.
- Built responsive and user-friendly interfaces.
- Integrated and consumed backend APIs on the frontend.
- Designed and managed **MySQL** and **PostgreSQL** databases.
- Participated in bug fixing, testing, and application performance optimization.
- Used **Git, GitHub, GitLab, and Jira** for version control, issue tracking, and collaborative development.
- Participated in **code reviews, merge requests**, and ongoing application maintenance.

Education

weCode training

epitech, Ivory Coast From Jun. 2025 to Dec. 2025

a training program initiated by GIZ as part of the FOR PRODE project, which aims to train young people in the field of digital technology

Bachelor's degree in Application and Service Development

virtual university, Ivory Coast 2025

Projects

Billing Management Application

Role: Full-Stack Developer

Commercial management web application for creating and tracking **pro forma invoices, delivery notes, and invoices**, managing customers, product and service catalogs, delivery tracking, and data exports.

- Designed and developed a RESTful API using **Laravel** and **PostgreSQL**, including **Laravel Sanctum** token-based authentication and **Spatie Roles & Permissions**.
- Developed the frontend with **Next.js 16**, **React 19**, and **TypeScript**, featuring filterable data tables (**TanStack Table**) and validated forms (**React Hook Form + Zod**).
- Implemented **PDF document generation** (DomPDF) and **Excel/CSV export** functionality.
- Wrote **unit tests** with **Jest** and **end-to-end tests** with **Playwright**.
- Containerized the application using **Docker (multi-stage builds)** and orchestrated services with **Docker Compose** (PostgreSQL, Nginx, PHP-FPM).

Technologies : **Laravel, PostgreSQL, Next.js, React, TypeScript, Tailwind CSS, Docker, GitLab CI**

Corporate Website & Back Office – GECLEAN SERVICE

Rôle : Full-Stack Developer

Developed a corporate website and administration back office for a cleaning services company, including a service catalog, quote request system with photo uploads, gallery, testimonials, team presentation, and contact messaging.

- Designed and developed a **Laravel/PHP REST API** with **58 endpoints**, providing fully standardized JSON responses and error handling.
- Implemented **JWT authentication** (tymon/jwt-auth) and **three-level Role-Based Access Control (RBAC)** using custom middleware.
- Built the frontend with **Next.js (App Router)**, **React**, and **TypeScript**, styled with **Tailwind CSS**, and integrated an **Axios client** with interceptors for token injection and automatic logout on HTTP 401 responses.
- Implemented **technical SEO**, including the Metadata API, Open Graph tags, generated **sitemap.xml** and **robots.txt**, and **Schema.org structured data** for local search optimization.
- Developed reusable image upload and management features using **UUID-based storage**, along with **non-blocking transactional email** handling with graceful fallback mechanisms.
- Created an **administration dashboard** featuring statistics, **Recharts** visualizations, server-side pagination, filtering, and search.
- Configured dedicated **CORS middleware** and a **GitLab CI** pipeline with secret detection.

Technologies : **Laravel, MySQL, JWT, Next.js, React, TypeScript, Tailwind CSS, Axios, Recharts, GitLab CI**
